- Soil stabilization
- Stormwater
- Paving and roadwork
- Remote
- Arctic
- Desert

➤ Energy construction

Past Projects

➤ OIL SEARCH ALASKA, North Slope (Remote Location)– Heavy Civil Works

We managed all ice road construction (200 Miles) for exploration and development. We prepared ice road construction plans for two exploratory drill sites, 5 and 21 Miles, gravel road construction and two gravel pits for oilfield development. Total cost \$250 Million. All construction was completed in 6 months.

➤ EXXON MOBILE ALASKA, Point Thomson (Remote Location)- Heavy Civil Works

We managed all construction to develop Pt. Thomson. We were responsible for a two year, \$280 million construction project. All work was conducted with close interaction between client, government agencies and local Inuit Villages.

➤ North Dakota Department of Transportation, North Dakota, Williston Area- Heavy Civil Works

Consultant to the NDDOT. Williston Permanent Truck Reliever Project. \$40 Million project. This consisted of 11 miles of a newly constructed, four lane highway corridor bypassing the northwest side of Williston, ND.

Differentiators

- Technology-focused approach to safety and compliance
- Background in all types of energy construction projects
- Experience working in 24-hour shifts in multiple environments
- Experience in remote and overseas worksites
